

GLITTERBOLT

ROLLER CLUB

Lace up. Light up. Roll on.

Action Plan

Step by step, from first phone call to month twelve

October 2026

Confidential

How to Use This Plan

The Business Plan says what Glitterbolt is and why it might work. This plan says what to do on Monday morning. It is built for one person with a day job or studies, working about ten hours a week on it, with a little help from friends at the start.

Every phase ends in a decision gate. A gate is a short, honest check against numbers set in advance. It has three outcomes. Green means carry on. Amber means fix one thing or run a bit longer. Red means stop or change the plan. Stopping at a gate is not a failure, because the pilot was designed to make stopping cheap. If the gate says stop after the three pilot nights, the cash lost is roughly £5,008. Skipping the pilot and buying the kit up front would put about £11,158 at risk.

Dates assume the plan starts on Monday 16 November 2026. If it starts later, move every date by the same number of weeks and keep the order.

One rule. No money is committed to a bigger step until the gate before it has passed. Hall deposit after Gate 1. Fleet and loan after Gate 2. Second night each month after Gate 3.

The First Week

Momentum matters more than polish. These are the first jobs, in order. None costs more than a few pounds. Sundays are for rest.

Day	Job	Output
Monday 16 Nov	Write a list of ten halls within 20 minutes of Epsom. Sports halls at leisure centres and schools first, then community halls. Check each hall's website for hire rates.	List with phone numbers and any published rates.
Tuesday 17 Nov	Ring Bourne Hall and ask three questions. Is the main hall floor suitable for roller skates, will they allow wheels, and what is the finishing time.	Yes or no on wheels. Written notes.
Wednesday 18 Nov	Ring five halls and ask for a written quote for a Friday night, 6.30pm to 11.30pm, 80 skaters, roller skating.	Five requests sent.
Thursday 19 Nov	Ask two specialist brokers for public liability and employers liability quotes at £5 million and £10 million. Describe the activity honestly.	Two quote requests.
Friday 20 Nov	Ring three competitors as a customer and ask what a private event costs. Disco Skate, Superfunk and Sk8hire are three to try.	Three price notes. Test of the £500 assumption.
Saturday 21 Nov	Open an Instagram and TikTok account under the Glitterbolt name. Post a first teaser. Check the name on Companies House and the UK trade mark register.	Accounts live. Name check done.

Pre-launch, Week by Week

Pre-launch runs eleven weeks, from 16 November 2026 to 4 February 2027. The first goal is to sell 25 Founding Skater Passes and find a hall at £75 an hour or less. The second is to be ready for pilot night 1 on Friday 5 February 2027.

Week	Starting	Main jobs	Spend
1	16 Nov	The first week above. Hall list, quote requests, insurance quotes, competitor calls.	£0
2	23 Nov	Compare quotes. Shortlist two halls. Visit them with a pair of skates and test the floor. Draft the booking page and waiver. Plan the First Wheels lesson with a local coach or skate club.	£0
3	30 Nov	Launch the Founding Skater Pass at £30 for three pilot nights. Tell friends, family and local groups. Post three short videos.	£50
4	7 Dec	Keep selling passes. Follow up with every enquiry. Ring Roller Kings about hire for the pilot weekends and book provisional dates.	£50
5	14 Dec	Final push on passes. Prepare the Gate 1 summary. Ask for the music licence quote.	£50
Gate 1	Fri 18 Dec	Check against the Gate 1 criteria. If green, sign the hall for 5 Feb, 5 Mar and 9 Apr 2027 and pay deposits.	Hall deposit
6	21 Dec	Light week. Buy insurance policy to start in January. Order speaker, lights and mirror ball.	£700 kit, £1,200 insurance
7	28 Dec	Light week. Write the risk assessment and incident book. Draft the privacy notice. Plan the first theme.	£0
8	4 Jan	Recruit two marshals and a DJ. Book first aid training. Open ticket sales for pilot night 1. Register for the data protection fee if needed.	£50
9	11 Jan	First aid course for two people. Agree the night timetable with the hall. Confirm kit hire booking for 4 to 7 Feb.	£300 training
10	18 Jan	Pass holders get their tickets. Check ticket sales against 40 skaters. Print signs, floor tape and cones. Post daily content.	£280 kit and signs
11	25 Jan	Rehearsal in the hall with friends. Time the setup. Test the speaker and lights. Fix problems. Final marshal briefing.	£50

The pre-launch budget in the model is £2,343, plus £1,200 for the first year of insurance. It includes a 10 percent contingency. Passes bring in £750 if the target is met.

Gate 1. Friday 18 December 2026

Gate	Green. Go on	Amber. Extend or fix	Red. Stop or rethink
Demand	25 or more passes sold	15 to 24 passes sold	Fewer than 15 passes sold
Hall	Written quote at £75 an hour or less, wheels allowed	Quote between £75 and £100, or a share of door deal on the table	Nothing below £100 an hour and no share of door deal
Insurance	Cover at £1,500 a year or less	£1,500 to £2,200 a year	Over £2,200 a year or cover refused
Action	Sign the hall and carry on	Extend two weeks and fix the weak spot	Stop, refund any passes and rethink the venue

The Pilot, Week by Week

Three Friday nights on rented kit. Kit comes on the Thursday, goes back on the Sunday or Monday and costs £602.50 a night. Pilot nights are not meant to make money. They are meant to answer one question. Will people pay, and will they come back.

Pilot night	Date	Target skaters	Theme	Focus
1	Fri 5 Feb 2027	40	Soul and Funk Friday	Does the night run safely and on time. Collect names and emails for every skater.
2	Fri 5 Mar 2027	48	Neon 80s	Do the Night 1 skaters come back. Does a theme lift sales.
3	Fri 9 Apr 2027	55	Y2K Pop	Does a cold audience turn up. Test advance sales.

Good Friday is 26 March 2027, so there is no pilot night that week. Between nights the job is the same every time. Send a thank you message the next morning. Post the best clips within 48 hours. Count advance sales a week out and again on the day. Ask every skater two questions at the door on the way out. Would you come again. What would make it better.

A typical pilot week

Day	Job
Monday	Review last night. Post clips. Reply to every message.
Tuesday	Count advance sales. Fix any ticket problems. Post a countdown.
Wednesday	Confirm marshals and DJ. Check the hall booking. Print the run sheet.
Thursday	Collect hired kit. Check every skate and pad. Count sizes.
Friday	Night. Hall opens 6.30pm. Doors 7.30pm. Lights up 11.00pm. Pack down.
Saturday	Return kit in good time. Clean and check everything. Rest.
Sunday	Rest.

Gate 2. By Friday 16 April 2027

This is the most important gate. Enter the real numbers in the Pilot Gate sheet of the Financial Model and read the decision.

Gate	Green. Go on	Amber. Extend or fix	Red. Stop or rethink
Attendance	Average of 45 or more skaters over three nights	Average 35 to 44	Average below 35
Advance sales	60 percent or more of tickets sold before the night	40 to 59 percent	Below 40 percent
Would return	70 percent or more say they would come again	50 to 69 percent	Below 50 percent
Safety	No serious injury, incident book clean	One minor incident with a clear fix	Any serious incident without a fix
Action	Buy the fleet, draw the loan, plan monthly nights	Run three more pilot nights on rented kit	Stop. Return kit. Refund unused passes.

If the result is green, apply for the Start Up Loan straight away. The model assumes the loan arrives in May 2027, and approval can take several weeks. If it arrives later, rent kit for one more night (about £602.50) and move the fleet purchase to June.

Growth Phase, Month by Month

Month	Nights	Main jobs
May 2027	1	Buy 50 pairs of skates, pads and helmets after quotes. Draw loan. Run the Disco Classics night. Start monthly bookkeeping habit.
Jun 2027	1	Review costs per night against the model. Open private hire enquiries on the website. Reach out to three hen party planners.
Jul 2027	1	First private hire event. Use it to test the £500 price. Collect a testimonial.
Aug 2027	1	Quieter month. Service every skate. Fix the website. Plan the autumn calendar. Cash is at its lowest this month, so spend nothing extra.
Sep 2027	1	90s Rewind night. Start selling Halloween and Christmas tickets early. Approach the University for the Creative Arts students' union.
Oct 2027	2	Halloween Ghou! Skate. Second night each month begins if Gate 3 is green.
Nov 2027	2	Neon 80s sequel. Review whether two nights split the audience or add to it.
Dec 2027	2	Glitter Ball Christmas. Peak month. Sell gift vouchers.
Jan 2028	2	Year 1 review against the model. Update every assumption with real figures. Decide on a licensed bar for Year 2.

Gate 3. Friday 1 October 2027

Gate	Green. Go on	Amber. Extend or fix	Red. Stop or rethink
Cash and attendance	Cash above zero and an average of 50 or more skaters since June	Cash above zero, attendance 40 to 49	Cash below zero or attendance below 40
Hall	A hall that can host a second monthly night at the same rate	A hall at up to £75 an hour	No second night available
Action	Add the second night each month	Hold at one night and test a different weekday	Hold at one night and cut costs

Years 2 to 5

Year	Nights	Private events	Milestones
Year 2	24	10	Review a licensed bar. Add 20 pairs of skates. Hire a third marshal. Break even on net profit. Gate 4 at the end of the year.
Year 3	30	16	Move to a limited company if profitable. First founder pay of £3,000. Test a weekday night. Appoint a lead marshal.
Year 4	36	22	Add 10 pairs of skates. Test a second hall. Cumulative profit turns positive.
Year 5	40	28	Run two halls if Gate 4 results hold. Founder pay of £9,000. Full review of the model.

The model charges founder pay of £3,000 in Year 3, £6,000 in Year 4 and £9,000 in Year 5, taken only from surplus. No expansion beyond Epsom and its nearest halls is planned before Year 4, and none is committed until Gate 4 shows a profit.

Every Night

Every night follows the same short checklist. It protects people and it protects the business.

When	Check
Two days before	Advance sales counted. Marshals and DJ confirmed. Hall contact confirmed. Weather and travel checked for the kit.
On arrival	Floor swept and checked for grit, spills and damage. Exits clear. Fire exit signs visible. First aid kit placed. Incident book at the door.
Before doors	Kit laid out by size. Pads counted. Skate wheels spun and checked. Waiver system working. Age check set up at the door.
During	One marshal for every 20 skaters in the first half hour. Floor kept clear of bags. Music volume checked. Anyone unwell sat out and looked after. Hire skates counted back in.
After	Skates counted. Kit sprayed and stored. Floor checked. Hall left as found. Takings reconciled. Incident book signed. Photos posted next morning.

Budget by Phase

All figures come from the Financial Model and move with it. The pilot cost is the cost of three rented nights, not the total cost of the project.

Phase	What it covers	Amount
Pre-launch	Speaker, lights, launch marketing, waiver and ticketing set up, signs and floor tape, first aid and marshal training, 10 percent contingency	£2,343
Insurance	First year public and employers liability	£1,200
Pilot	Kit hire for three nights (excluding refundable deposit)	£1,808
Fleet	50 pairs of skates, pads, helmets and cases	£6,150
Total fixed spend		£11,501
Money available	Founder cash £7,500, passes £750, Start Up Loan £5,500	£13,750
Left for running costs	Hall, DJ, marshals and overheads until ticket income takes over	£2,250

The lowest cash balance in Year 1 is £735, in August 2027. That is a narrow margin. Do not spend anything outside this plan before then.

If Things Go Wrong

If the gate says extend

Run three more pilot nights on rented kit and change one thing at a time. Move the day of the week. Change the theme. Cut the ticket price by £2 for one night to test the price. Change only one, or the result will not tell you what worked.

If the gate says stop

Do not draw the loan. Return the rented kit and collect the deposit. Refund any unused Founding Skater Passes. Sell the speaker and lights. Cancel any hall booking within its terms. Write up what was learned, including the number that killed it. Then decide whether the idea belongs in another form, such as private hire only, which needs no hall for 12 months and carries no ticket risk.

If an injury happens

Call the emergency services if needed. Look after the person first. Write it in the incident book that night. Tell the insurer within the time their policy requires. Tell the hall. Do not discuss fault with anyone except the insurer.

If the hall rate is higher than planned

Do not sign above £75 an hour without a share of door income deal or a ticket price of £17. At £115 an hour the Year 3 model shows a loss before the founder is paid.
