

THE BRASS AUTOMATON

A Steampunk Cocktail Bar with Robotic Bartenders and Live Music

Business Plan | June 2026 | Confidential

THE GAP IN LONDON'S NIGHTLIFE

The Problem

London's cocktail bars are starting to look the same. Dark interiors, exposed brick, the same playlist. The average cocktail costs £13 and rising.

Consumers want experiences. Themed bars (Mr Fogg's, Cahoots) consistently outperform standard venues. But none of them use technology as part of the show.

Robotic bartender tech has matured. \$1.8B market globally. 72% growth in installations. But it's stuck in cruise ships and airports. Nobody has brought it to London's independent bar scene.

The Numbers

£587M UK cocktail market value

£13 Average London cocktail price (rising 51p/year)

\$1.8B Global robotic bartender market (2025)

\$5.6B Projected by 2034 (13.5% CAGR)

THE CONCEPT

Four elements. One venue. Nothing else like it in London.

1. STEAMPUNK DESIGN

Victorian-industrial interior. Brass, copper, Edison bulbs, gears, vintage instruments. Staff in period costume.

2. ROBOTIC BARTENDERS

Two robotic cocktail units in custom brass casings. Every drink is a performance. 60-90 seconds per cocktail.

3. LIVE MUSIC

Jazz, swing, acoustic. Thursday to Saturday. No cover charge. Fits the era.

4. TAPAS AND COCKTAILS

50+ drinks across 11 categories. Small plates menu. Unlimited drink package ("The Boiler Room").

MARKET OPPORTUNITY

The audience is already there.

Shoreditch has London's highest concentration of independent bars. The area draws 25-40 year old professionals, tourists, and creatives who actively seek distinctive venues.

Themed and immersive bars consistently outperform standard venues on bookings, repeat visits, and social media engagement.

At steady state, The Brass Automaton needs 85 covers per night. That is roughly 70% of capacity. In a borough with thousands of people looking for somewhere interesting to go on any given evening, 85 is a small target.

The opportunity is not about volume. It is about being memorable enough that the right 85 people choose this bar on any given night.

Target Customer

Age 25-40

Young professionals with disposable income

Experience seekers

People who choose venues for the story, not just the drink

Social media active

Likely to share robot cocktail videos organically

Group bookers

Birthday groups, work socials drawn by The Boiler Room

Tourists

Looking for "only in London" experiences
